PROFILE SUMMARY

Computer Science graduate (Class of 2026) with a strong background in programming, AI, Machine Learning, and Front-End Web Development. Experienced in teaching through part-time instructor work at iSchool and technical mentoring at MSP Student Activity. Skilled in explaining programming concepts clearly, delivering project-based sessions, and guiding students through practical tasks, debugging, and mini-projects. Proficient in Python, JavaScript, React.js, and core ML tools, with a passion for helping students build real-world programming skills.

EDUCATION

B.Sc. in Computer Science - Ain Shams University | Class of 2026 | Cairo, Egypt

TEACHING & MENTORING EXPERIENCE

Coding Instructor - iSchool | Part-time

- Delivered coding sessions using project-based learning, hands-on practice, and practical programming tasks.
- Explained programming fundamentals in a simple way and supported students during debugging and mini-projects.

Peer Mentor & Technical Instructor - MSP Student Activity, Ain Shams University (Mar 2025 - Present)

- Delivered technical sessions on web development, AI concepts, and data science to university peers.
- Mentored students in Python, JavaScript, React.js, and ML fundamentals through project-based guidance.
- Co-developed SkillUp - an educational platform offering structured online courses and learning resources.

GRADUATION PROJECT

Multilingual NLP Medical Assistant | Tools: Python | Transformers | RAG | FAISS | NLP | Deep Learning

- Built a bilingual (Arabic/English) medical Q&A system using transformer-based models and RAG with FAISS.
- Improved Top-1 accuracy from 5.3% to 85.8%; achieved 98.9% accuracy and ~0.81 F1-score on real-world clinical queries.

TRAININGS & CERTIFICATIONS

AI & Machine Learning Training - Huawei (Apr 2025) - ML algorithms, model training, deep learning, and real-world AI project development.

Professional Front-End Web Development Nanodegree - Udacity (MCIT, Egypt) (Oct 2024) - Responsive web apps using React.js, advanced CSS, and JavaScript.

IoT Course - Information Technology Institute (ITI) (Jul 2023) - Hands-on IoT systems, sensor integration, and real-time data monitoring.

KEY PROJECTS

AI & ML: Classification models (Scikit-learn, Pandas, NumPy) with EDA and feature engineering | Computer Vision: object detection (OpenCV, YOLO) and CNN classifiers (PyTorch).

SkillUp Learning Platform - MSP - Ain Shams University | Front-End Developer | React.js, Bootstrap, JavaScript - Educational platform with online courses and student activities.

Student Affairs Management System | Full-Stack Developer | HTML, CSS, JS, Python, SQLite - Web app with CRUD, authentication, and dynamic data management.

Kusina Website | Front-End Developer | HTML5, CSS3, Bootstrap - Responsive recipe sharing site with a modern UI.

Movies Website | Developer | React.js - Interactive browsing platform with advanced search and filtering.

Other: Food Order System (Java) | Railway Reservation (C++) | Calculator (C++) | Smart Home (IoT) | Weather Station (IoT)

TECHNICAL SKILLS

AI & Machine Learning: Machine Learning | NLP | Deep Learning | Computer Vision | Model Evaluation | RAG | FAISS

Libraries & Frameworks: Scikit-learn | PyTorch | Pandas | NumPy | Matplotlib | OpenCV | YOLO | Jupyter Notebook

Front-End Development: React.js | JavaScript (ES6+) | HTML5 | CSS3 | Bootstrap | Responsive Design

Programming Languages: Python | JavaScript | C++ | Java | SQL

Tools: Git | GitHub | VS Code | SQLite | SQL Server

Soft Skills: Technical Communication | Public Speaking | Problem Solving | Teamwork | Leadership | Time Management

LANGUAGES

Arabic: Native | **English:** Very Good | **German:** Elementary
